Division Director

Technical Analysis and Findings

Utah Coal Regulatory Program

PID: C0070005
TaskID: 4590
Mine Name: SKYLINE MINE
Title: REMINING SCOFIELD WASTE

Operation Plan

Topsoil and Subsoil

Analysis:

Topsoil will be stripped from the contemporaneously reclaimed waste rock site in segments as it is remined. The topsoil will be salvaged and stockpiled at a stable location below the site shown on Plate 3.2.8-1. The topsoil will be seeded and protected with berms as described on page 4-39a-1 of Section 4.6.4.1. The application is in compliance with R645-301-231.

pburton

Topsoil and Subsoil

Analysis:

The application states that topsoil will be places in piles no deeper than 10 to 15 feet high with outslopes no steeper than 2h:1v.

Spoil Waste Refuse Piles

Analysis:

Updated version of Maps 3.2.8-1 and 3.2.8-2 were submitted with the application. The information on the maps adequately depicts the changes requested in the amendment. The maps will need to be properly certified with the final submittal.
